<input type="checkbox"/> Dextromethorphan, 20-30 mg every 6 hours as needed	cough
If none of above working, you do NOT have heart problems or high blood pressure, may consider:	
<input type="checkbox"/> Phenylephrine or pseudoephedrine, limit 2-3 days	cough & congestion

The symptoms you presented with today suggest a VIRAL infection.

You have not been prescribed antibiotics because **antibiotics are ineffective for viral infections**, cause side effects, and may cause serious harm.

Please return or call if symptoms do not improve in ____ day(s), you develop worsening fevers, shortness of breath, or other new or concerning symptoms: _____

Limit the spread of infection to others:

- Wash your hands frequently
- Cover your cough/sneeze
- Wear a mask when near others
